### USAGE - INSTRUCTIONS ON HOW TO MAKE IT HAPPEN

---

#### How can I use it?

Start with freshly roasted, coarse ground coffee. Grind only as much coffee as you need to brew each pot.

1. Fill in the desired amount of coarse ground coffee.

**TIP:** Always use coarse ground coffee when brewing with a BODUM® coffee press.

**TIP:** Add one level BODUM® scoop (7 grams, 0.25 oz) of coarse ground coffee per 1.2dl/4oz cup of water to the beaker.

**TIP:** Adjust the amount of coffee to taste.

2. Add hot water (195 - 205F/90C° - 96C°)

**TIP:** To reach the perfect temperature, bring the water to a full boil and then allow it to rest for 30 seconds before pouring.

3. Carefully give the coffee a stir to make sure that all of the coffee grinds are submerged. Freshly roasted coffee will “bloom” and rise up as it starts to brew and release gases.

4. Place the press/lid onto the pot in the up position. Line the safety lid so that it is in the closed position in line with the pour spout.

5. Allow the coffee to brew for 4-minutes

6. Press gently

**TIP:** If it is hard to press, simply raise the plunger rod up about one inch and then resume pressing.

7. Turn the safety lid to the pour position, serve & enjoy a gourmet cup of coffee.

**TIP:** After serving, turn the safety lid back to the closed position to help retain heat.

**TIP:** There are no filters needed. The 3-piece filter assembly is part of the press and, unlike a paper filter, It allows the coffee to maintain its natural oils and acids which give the coffee balance and flavor. The filter assembly unscrews for easy cleaning when necessary. Before brewing, ensure that the filter is completely screwed into place and secure.

BODUM® Item No. 10743-16, 1.0l/34oz

### SAFETY ISSUES & CAUTIONARY INFORMATION

---

- Keep children away from boiling water.
- As with all hot objects, the coffee press & hot coffee should be kept away from children. Press your coffee in a safe area away from children.
- Do not allow children to use this coffee maker.
- Place the coffee maker on a heat proof, non-slip surface when using.
- Do not use force when pressing coffee. Press gently. Excessive force can cause scalding liquid to shoot out of the pot. Turn lid to close spout during the brewing and pressing process.
- Not for stovetop or microwave use.
- Use only coarse ground coffee. Fine grind can clog the filter and create high pressure
- Follow the coffee and water markings on the body of the coffee press, do not overfill the coffee press.

---

**CONSUMER INFORMATION - MANUFACTURING, MATERIALS & CAUTIONARY INFO**

---

**How is the product manufactured?**

The beaker of the PRESSO is made from a piece of stainless steel that is deep drawn into a mould. The two parts are welded together to achieve the double wall construction. The handle, made of plastic covered with heat-resistant non-slip rubber is firmly attached to the beaker.

**More information on the materials**

Stainless steel offers a long life span to products. It makes them highly durable and offers timeless simplicity of form.

The rubber on the handle and knob offer easy handling remaining cool to the touch and making the PRESSO comfortable to hold due to the non-slip qualities.

**How durable is the product?**

Stainless steel is a very durable material and if treated correctly, it will last a very long time.
