

BODUM® item no. 10820-16

#### **PRODUCT DESCRIPTION - THE STORY**

---

Featuring a minimal form made from stainless steel, the BISTRO Double Wall French Press® Coffee Maker by BODUM® proves that good design is functional. Adhering to BODUM®'s credo of “beautiful and simple yet innovative”, this French Press® coffee maker infuses your preferred coarse ground coffee with the proper water temperature to produce an exceptionally rich brew. The double wall construction of the carafe creates a thermal effect, keeping coffee hot long after brewing. The entire body of the jug is made of high quality double-wall stainless steel. The safety lid prevents liquids from squirting out of the pot. Additionally, the BISTRO features a black stay-cool plastic handle and is available as an 8-cup coffee maker (1l/34oz). All parts are dishwasher safe.

BODUM® Item No. 10820-16, shiny finish, 8 cup, 1.0l/34oz  
10820-57, matte finish, 8 cup, 1.0l/34oz

## 02 **Double wall Coffee Maker BISTRO**

BODUM® Product Information

### **KEY FEATURES & BENEFITS - AN OVERVIEW**

---

- The BODUM® press system is accepted worldwide as the best way to brew coffee
- Double-wall stainless steel body keeps coffee pleasantly warm and aromatic for longer
- Quick & easy to use; just add coffee & hot water
- The press system maximizes the brewing process & preserves the essential oils & acids that give coffee its balance and flavor
- No additional filter needed – stainless steel filter included
- No paper filters needed
- Safety lid for a clean performance
- Dishwasher safe
- Spare parts available

### **USAGE - INSTRUCTIONS ON HOW TO MAKE IT HAPPEN**

---

#### **How can I use it?**

For best results, pre-heat the stainless steel beaker with hot water to maximize the heat retention. Once heated discard the water before adding coffee. Start with freshly roasted, coarse ground coffee. Grind only as much coffee as you need to brew each pot.

1. Fill in desired amount of coarse ground coffee.

**TIP:** Always use coarse ground coffee when brewing with a BODUM® coffee press.

**TIP:** Add one level BODUM® scoop (7 grams, 0.25 oz) of coarse ground coffee per 1.2dl/4oz cup of water to the beaker.

**TIP:** Adjust the amount of coffee to taste.

2. Add hot water (195 - 205F/90C° - 96C°)

**TIP:** To reach the perfect temperature, bring the water to a full boil and then allow it to rest for 30 seconds before pouring.

3. Carefully give the coffee a stir to make sure that all of the coffee grinds are submerged. Freshly roasted coffee will “bloom” and rise up as it starts to brew and release gases.

4. Place the press/lid onto the pot in the up position. Line the safety lid so that it is in the closed position in line with the pour spout.

5. Allow the coffee to brew for 4-minutes

6. Press gently

**TIP:** If it is hard to press, simply raise the plunger rod up about one inch and then resume pressing.

7. Turn the safety lid to the pour position, serve & enjoy a gourmet cup of coffee.

**TIP:** After serving, turn the safety lid back to the closed position to help retain heat.

**TIP:** There are no filters needed. The 3-piece filter assembly is part of the press and, unlike a paper filter, it allows the coffee to maintain its natural oils and acids which give the coffee balance and flavor. The filter assembly unscrews for easy cleaning when necessary. Before brewing, ensure that the filter is completely screwed into place and secure.

BODUM® Item No. 10820-16, shiny finish, 8 cup, 1.0l/34oz  
10820-57, matte finish, 8 cup, 1.0l/34oz

## 03 **Double wall Coffee Maker BISTRO**

BODUM® Product Information

### **RIGHT PRODUCT TREATMENT - CLEANING & CARE**

---

#### **How do I clean/treat the product right?**

After enjoying your coffee, simply remove the lid/press and, using a rubber spatula, scoop out the used grinds and dispose. Rinse the press out and wash with soap and water or place the entire unit in the dishwasher.

### **MATERIAL FEATURES**

---

<b>Lid:</b>	plastic, stainless steel
<b>Knob:</b>	plastic
<b>Body:</b>	stainless steel
<b>3-part coffee filter:</b>	stainless steel, plastic, silicone
<b>Handle:</b>	plastic

#### **How does the material comply with food?**

All materials used are odor and taste free and do not absorb the taste of food

#### **Is this product a «refresh» of an existing product or «brand new»?**

-

#### **How/when can the product be affected, brake, deteriorate?**

Handle with care. Do not use force when pressing, press gently.

### **COLORS - FINISH, PATTERN, GLAZE**

---

- stainless steel
- black

### **COUNTRY OF ORIGIN**

---

China

### SAFETY ISSUES & CAUTIONARY INFORMATION

---

- Keep children away from boiling water.
- As with all hot objects, the coffee press & hot coffee should be kept away from children. Press your coffee in a safe area away from children.
- Do not allow children to use this coffee maker.
- Place the coffee maker on a heat proof, non-slip surface when using.
- Do not use force when pressing coffee. Press gently. Excessive force can cause scalding liquid to shoot out of the pot. Turn lid to close spout during the brewing and pressing process.
- Not for stovetop or microwave use.
- Use only coarse ground coffee. Fine grind can clog the filter and create high pressure
- Follow the coffee and water markings on the body of the coffee press. Do not overfill the coffee press.

BODUM® Item No. 10820-16, shiny finish, 8 cup, 1.0l/34oz  
10820-57, matte finish, 8 cup, 1.0l/34oz

**CONSUMER INFORMATION - MANUFACTURING, MATERIALS & CAUTIONARY INFO**

---

**How is the product manufactured?**

The beaker of the BISTRO is made from a piece of stainless steel that is deep drawn into a mould. The two parts are welded together to achieve the double wall construction. The handle made of plastic covered with heat-resistant non-slip rubber is firmly attached to the beaker.

**More information on the materials**

Stainless steel offers a long life span to products. It makes them robust and it underlines timeless simplicity of form.

The handle and knob offers easy handling because it is comfortable and stays cool to the touch.

**How durable is the product?**

Stainless steel is a very durable material and if treated correctly, it will last a very long time.
