

HARMAN KARDON® GO + PLAY™ WIRELESS

Chic, wireless loudspeaker designed to give your digital music a boost in style and sound

A fashionable way to play
your music on the fly

Stylish form meets superior function in this high-performance, wireless loudspeaker. The portable Harman Kardon® Go + Play™ Wireless fills any space with a full spectrum of high, mid and resounding bass tones. It streams music from any *Bluetooth*® device and it's designed to work with the iPad mini, iPad (4th generation), iPhone 5, iPod touch (5th generation) or iPod nano (7th generation). And its HARMAN TrueStream™ wireless technology guarantees the highest-quality sound. You get the powerful, distinctive Harman Kardon sound you've come to love – in a pristine, portable package. So grab the sleek, stainless-steel handle and take beautiful sound wherever you go.

- 1/8" (3.5mm) stereo input jack
- Free Harman Kardon Remote App
- Compatible with Apple iPad mini and iPhone 5

KEY FEATURES

Harman Kardon® Go + Play™ Wireless

Superior sound and style designed to move you – and move with you.

Bluetooth-enabled

Let's face it, most of our audio devices are Bluetooth-capable. And we're not using them just for music; we're watching movies and playing games as well. You can connect your Bluetooth-enabled devices such as your tablet, phone and laptop to the Harman Kardon Go + Play Wireless and get superior sound quality from all of your audio sources.

Compatible with Apple iPad mini and iPhone 5

The Go + Play Wireless streams high-quality audio from the iPad mini, iPad (4th generation), iPhone 5, iPod touch (5th generation) or iPod nano (7th generation). So no matter which Apple device you use, you'll enhance your favorite music with beautiful sound from Harman Kardon.

HARMAN TrueStream technology

HARMAN TrueStream tech guarantees the best possible listening experience when you stream audio wirelessly via *Bluetooth* connection. Our products always use the most current, most advanced wireless technology option to ensure the highest-quality sound, no matter what application or source device you use.

Intelligent equalization (EQ) technology

We've computer-optimized the Harman Kardon Go + Play Wireless loudspeaker to produce all-encompassing, room-filling sound. With intelligent-equalization (EQ) technology in place to improve stereo imaging greatly, this speaker delivers a powerfully tuned digital audio path that ultimately leads to unsurpassed precision in performance. This is just a fancy way of saying that this system sounds great, no matter how you're using it.

Bi-amplification

Beautiful sound and great efficiency make the Harman Kardon Go + Play Wireless smarter than your average portable loudspeaker. Using bi-amplification, its woofers and tweeters are independently amplified for exceptional richness and clarity of sound. With the Harman Kardon Go + Play Wireless, you'll experience crisp highs and mids coupled with resounding, thunderous bass. It far outperforms other companies' products in this category.

Sleek, modern industrial design

The high-performance Harman Kardon Go + Play Wireless loudspeaker combines high-minded utility with sublimely functional industrial design. Its stylish, understated look complements virtually any interior-design scheme.

Two Atlas woofers and two Ridge tweeters

A rich, full spectrum of sound with tight, thunderous bass that consistently fills up the soundstage – music lovers want it, and the Harman Kardon Go + Play Wireless delivers it. No matter how and where you play this luxurious, high-end loudspeaker, its sound will always set it apart.

Battery and AC power modes

The Harman Kardon Go + Play Wireless system uses eight type-D alkaline batteries to keep the music flowing when you're out and about. When it's plugged in, the system uses AC power, preserving the batteries. That way, when your social schedule takes you away from the world of wall outlets, it won't take you away from your fine taste in music.

SPECIFICATIONS

Harman Kardon® Go + Play™ Wireless

A fashionable way to play your music on the fly.

What's included:

- 1 Harman Kardon Go + Play Wireless loudspeaker
- 1 AC plug
- Owner's manual
