PRODUCT FACT SHEET

STACKED PODIUM SYSTEM
FURNITURE / LIGHTING / ACCESSORIES

JDS Architects on the design "How to be specific and generic altogether? Shelving systems have a tendency to achieve one concern but never both. We decided to dimension shelving units based on the generic measurements of things to store and display while allowing for them to be combined according to specific needs and desires. The result can be at times a random stack of boxes or a coordinated grid of efficient storage... or both!"

PROCESS	White MDF: Every side is cut out of MDF, assembled, glued together and painted with 3 layer of PU lacquer.
	Ash: Every side is cut out of MDF with ash veneer on top, then assembled and glued together.
DESIGNED BY / YEAR OF DESIGN	JDS Architects / 2012
TYPE	Podium for Stacked shelf system
DESCRIPTION	A base/podium for the Stacked shelving system, to lift the Stacked boxes up from the floor.
ENVIRONMENT	Indoor / Free standing
DIMENSIONS (CM)	Height: 20 Width: 35 Length: 131
MATERIAL	White MDF or ash veneer
CLEANING INSTRUCTIONS	Remove dust from shelves with a soft cloth or remove abrasive dust particles. When necessay clean with moist cloth. For wood veneer finishes, dry immediately with soft cloth following wood grains. The wood should not be subjected to excessive heat, direct sunlight of humidity.
WEIGHT & HEIGHT LIMITS	Max. 70 kg.
ABOUT THE DESIGNER	Copenhagen based Julien De Smedt is the co-founder of Plot and an internationally acclaimed architect. He is recognized for his ability to always take a fresh look at things. His works challenge conventions and many have been awarded. At only 29 years old he won the Golden Lion for world's best concert hall at the Venice Biennale.
