

senz° original

Playing with the wind has become not only easy and comfortable, it's a lot of fun too! The senz° original easily slices its way through all winds, from an afternoon breeze to strong autumn gusts.

Due to its aerodynamic design, the senz° storm umbrellas always find the most comfortable position in the wind. That makes it exceptionally pleasant to use the senz° original, even in strong gales. The smart design prevents the umbrella from turning inside out and makes it windproof up to 100 km/h (63 MPH)! Additionally, its unique shape gives you a perfect sight with the best possible rain protection.

The senz° original is a winner of multiple design awards. Its smooth oval shaft matches seamlessly with the aerodynamic shape of the umbrella. It is not only very functional, but also a delight for your eyes!

features

canopy

The water repellent pongee fabric provides UV protection, while the drops of rain easily slide off.

flexible ribs

The patented construction allows the senz° storm umbrellas to withstand winds up to 100 km/h, without going inside out!

eyesaver

The eyes of fellow pedestrians are protected by these unique rib tips. Finally, no more umbrella eye-poking!

elastic cord

The flexible senz° cord provides an easy and comfortable carrying experience.

aerodynamic shape

The aerodynamic shape of the senz° storm umbrella allows you to play with the wind with unmatched comfort, while maintaining the best possible rain protection.

vision

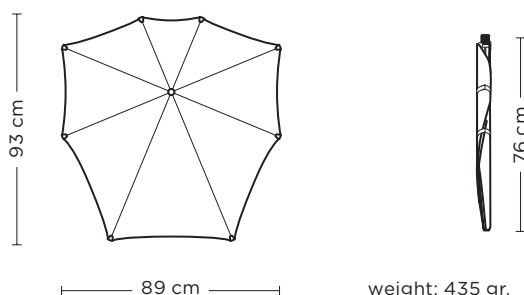

The shorter front end provides great visibility, so bumping into other umbrella users is a thing of the past!

handle

The oversized handle combines a comfortable grip with an innovative pull down opening system.
