

Dear colleagues,

It is December again.

We can look back on an exciting year with a variety of orders and successful events. The re-signaling contract for the existing metro line of Amsterdam should be specifically mentioned, due to the magnitude and importance for the Dutch Transport organization.

The integration of the Grid Sector is going well and Grid will further expand next year. In project execution, important projects were completed or brought into a new phase, such as the power plant Claus C, which is currently being constructed.

The events RailTech, Clean Power Day and the Customer Museum Event received great interest from our customers. For next year, there are also plenty of commercially interesting dates and events on the agenda.

This year's theme of the Alstom Christmas gift is 'something for everyone'. This website offers the opportunity to choose a gift to your liking. Even those interested in a traditional Christmas package, can have their wishes fulfilled.

On behalf of Alstom Grid, Alstom Power and Alstom Transport, we want to thank all Alstom Netherlands employees for their efforts this year and we wish all of you a healthy and prosperous New Year!

Sincerely,

Management of Alstom Netherlands

Ronald van Amstel
